EDUCATION

- | | |
|--|--|
| M.Sc. in Computer Science
<i>Trinity College Dublin</i> <ul style="list-style-type: none">Specialized in AR/VR, Machine Learning, and Computer Graphics. | Sep. 2020 – Oct. 2021
<i>Dublin, Ireland</i> |
| Bachelor's in Computer Engineering and Information Systems
<i>Universitat Pompeu Fabra</i> | Sep. 2016 – Dec. 2019
<i>Barcelona, Spain</i> |
| Study Abroad, Ajou University
<i>Ajou University</i> <ul style="list-style-type: none">Studied a semester at <i>Ajou University</i>. | 2017
<i>Suwon, South Korea</i> |

EXPERIENCE

- | | |
|---|--|
| Full-Stack Software Engineer
<i>Accenture Netherlands</i> <ul style="list-style-type: none">Worked in one of the largest banks in the Netherlands, where we migrated user accounts from an outdated system to a new, cloud-based application built in AngularJS and Kotlin with Spring.Gained DevOps knowledge by: implementing CI/CD pipelines; automating build, test, monitoring and logging to ensure system reliability and performance; and managing a microservices infrastructure.Internal project to research the viability of hosting websites on a satellite, built a front-end web app with interactive 3D models in ThreeJS. | October 2021 - Currently
<i>Amsterdam (Netherlands)</i> |
| Software Engineer
<i>NexoTech</i> <ul style="list-style-type: none">Led project about designing and building of a full-stack web application build in ReactJS and Java Spring for counting the amount of people in a building with IoT and Deep Learning implementations.Implemented a Machine Learning model with Keras and Python that recognizes gender and age. Used AWS Rekognition in production for better speed and accuracy. | April 2018 – Dec. 2019
<i>Mataró, Barcelona (Spain)</i> |
| Freelance Python Teacher
<i>Projecte SocialNEET</i> <ul style="list-style-type: none">Taught beginner level Python and Machine Learning for a governmental learning project. | February 2021
<i>Barcelona (Spain)</i> |

PROJECTS

- | | |
|--|-----------------------------|
| 3D Copy & Paste <i>ARKit, Swift, Python, Blender</i> <ul style="list-style-type: none">Developed an iOS app that obtains a 3D mesh using LiDAR from a 4th Gen iPad Pro, and seamlessly sends the mesh to a 3D modeling program (Blender) by pointing the camera to it.Blender Add-on written in Python that retrieves the model and positions it at the centroid between the camera picture and the computer screen. | April 2021 - September 2021 |
|--|-----------------------------|
- More Web and Mobile applications in an abundance of programming language, frameworks and libraries can be found at: github.com/janjs

SKILLS

Programming Languages: Java · Kotlin · Python · JavaScript/TypeScript.
Frameworks: React JS · Angular JS · Spring · Three JS · React Native · Django · ARKit · iOS UIKit · OpenGL.
Machine Learning: PyTorch · AWS/GCP machine learning tools (Rekognition, Firebase ML).
Database Management: SQL (MySQL/Oracle/PostgreSQL) · NoSQL (CosmosDB) · Firebase.
Developer Tools: Git · IntelliJ · VS Code · Firebase · XCode · Azure DevOps.
Web Markup Languages: HTML/CSS.
Others: DevOps · OOP · AOP · Computer Graphics (C++) · Machine Learning.
Spoken Languages: English (*Level C1 - Cambridge English: Advanced*) · Spanish (*Native*) · Catalan (*Native*).
